Polygraph reviews

On May 12 2021 the undersigned did a polygraph test to the examinee. The examinee gave his consent to take the test on his free will and signed the consent forms.

Health condition: proper health condition.

Previous tests: none.

test subject: Deposition exam

:clarification conversation

The subject denies:

That he has been lying in one of the sections in the deposition he gave me today.

That in the deposition he gave me today he lied in one of the sections._

In the polygraph exam, the subject had been asked the following relevant questions, which he replied negatively:

1. Did you lie in one of the sections in the deposition you gave me today?
2. In the deposition you gave me today did you lie in one of the sections?

Findings:

During the exam, no reactions were diagnosed for lying in the subject answers for the relevant questions.

summary and recommendation:

The findings of the polygraph examination are that: The subject is telling the truth in his answers to the relevant questions.
